
PyBBm Extensions Documentation

Release 0.1

Jakub Zalewski

Jun 20, 2017

1	Project links	1
2	Contents	3
2.1	Installation	3
2.1.1	Using PIP	3
2.1.2	From source	3
2.1.3	Settings	3
2.1.4	Dependencies	4
2.1.5	Upgrading	4
2.2	Extensions	4
2.2.1	Pluggable	4
2.2.1.1	Register model	4
2.2.1.2	Display comments	4
2.2.2	Search	5
3	Indices and tables	7

CHAPTER 1

Project links

Source

- builds: <http://pypi.python.org/pypi/pybbm-extensions/>
- repository: <https://bitbucket.org/zalew/pybbm-extensions/>

Meta

- docs: <http://readthedocs.org/docs/pybbm-extensions/en/latest/>
- bugs, feature requests: <https://bitbucket.org/zalew/pybbm-extensions/issues>

Installation

Using PIP

The latest stable-ish build:

```
pip install pybbm-extensions
```

Development version:

```
pip install git+https://bitbucket.org/zalew/pybbm-extensions
```

From source

```
git clone https://bitbucket.org/zalew/pybbm-extensions
cd pybbm-extensions
./setup.py install
```

Settings

```
INSTALLED_APPS = (
    ...
    'pybb_extensions.pluggable',
)
```

```
./manage.py syncdb
```

Dependencies

- Django
- PyBBm

Upgrading

South is used for migrations.

Extensions

Pluggable

Use PyBB as a pluggable comment system. By registering a model, you can have every created instance to have its Topic, and display Posts as comments.

Register model

```
from pybb_extensions.pluggable.models import register as pybb_register

class MyModel(models.Model):
    ...

    """Required. To which forum should we save the Topic?"""
    def forum_id(self):
        return 123

    """Not required. Defaults to string representation."""
    def forum_topic_title(self):
        return self.title

    """Not required. Defaults to string representation."""
    def forum_topic_body(self):
        return '<a href="%s">You should see this! "%s"</a>' % (self.get_absolute_
→url(), (self.title or 'hello world'))

    """Not required. Defaults to now."""
    def forum_topic_added(self):
        return self.date_added

pybb_register(MyModel)
```

Display comments

```
{% load pybb_pluggable_tags %} {% or add_to_builtins('pybb_extensions.pluggable.
→templatetags.pybb_pluggable_tags') %}

{% if obj.has_plug %}
    {% pluggable_topic obj user %}
    {% if user.is_authenticated %}
```

```
        {% pluggable_topic_form obj user %}  
    {% endif %}  
{% endif %}
```

Search

#TODO

CHAPTER 3

Indices and tables

- `genindex`
- `modindex`
- `search`
